

COMPLETE ICE ARENA SERVICES

Full Preventive Maintenance Service Plan

Objective

Offer a complete factory recommended ice resurfacers service.

Goals

Reduce costly down time, unwanted service calls, create a better sheet of ice, and extend the life cycle of the ice resurfacers.

Full Preventive Maintenance Service Plan Outline (PMSP)

All parts are provided with this program. All PMSP work is preferred to be completed at CIAS's Shop or can be scheduled on site to work around the facilities schedule. The pros of sending us your ice resurfacers is a shop full of parts, tools and a wash bay to clean your resurfacers when the service is complete.

The first maintenance visit would be before the skating season. Visits two and three will be scheduled at the facility by splitting the remaining year in thirds and consist of a basic service/inspection to develop a comprehensive list of repairs that could cause future break down.

Inspect (Visits 1, 2, & 3)

- Ice Making
 - Conditioner
 - Water System
- Wash Water System
- Front & Rear Drive Motors
- Distributor
- Brake System
- Pumps
 - Hydraulic & Water
- Hydraulic
